ABOUT ME

I am a proactive DevOps Engineer with a strong foundation in automation and Linux. I am committed to ensuring smooth operations and enhancing system reliability using my excellent skills in infrastructure as code and implementing security policies.

EXPERIENCE

DevOps Engineer | Deloitte Digital

Nov 2021 – Oct 2023

- Develop scripts that improved the generation of performance reports by 60%.
- Develop scripts to automate and improve monitoring systems and alerts
- Perform root cause analysis of production errors and resolve technical issues
- Ensure the configuration management across our server landscape

Infrastructure Engineer | Bitdefender

Nov 2019 – Oct 2021

- Perform server administration tasks (ex: user/group, security permissions, group policies; research event-log warnings and errors; and monitor resources to ensure systems architecture components work together seamlessly. (CentOS, Ubuntu)
- Monitor data-center health using existing management tools, and respond to software issues as they arise; help build, test, and maintain new servers when needed
- Manage, provide, and install trusted SSL certificates

Quality Assurance | Balena LTD

July 2016 – Nov 2019

- Plan and execute testing for quality and conformance to specifications
- Develop or update procedures for capture and investigation of product complaints
- Monitor risk-management procedures, maintain problem logs, and report issues to managers and product developers
- Build a testing framework to test different methods of booting SBCs (Single Board Computers) and their on-board peripherals for 70% faster iterations

Web Developer | SC Info Grup SRL

Jan 2018 – Sep 2019

- Creating a website using languages such as HTML, CSS, and WordPress: resurse-ocupare-giurgiu.ro
- Improving and enhancing websites after they have been created
- Developing contingency plans in the event of websites going down

CERTIFICATES

LFS207: Linux System Administration Essentials | [The Linux Foundation](#)

📍 Issued April 2024

HashiCorp Certified: Terraform Associate (003) | [HashiCorp](#)

📍 Issued June 2023

PROJECTS

Home Infrastructure | 

- A set of playbooks that aims to configure a home infrastructure using Ansible

Deploy AWS with Terraform | 

- Build, change, and destroy AWS infrastructure using Terraform.

EDUCATION

Computer Science and Engineering Programme | [University Politehnica of Bucharest](#)

📅 2009 – 2013

📍 Bucharest, Romania

- Major: Automatic Control and Computer Faculty

Information Technology and Mathematics | [Dunarea](#)

📅 2005 – 2009

📍 Galati, Romania
